2. **FURTHER ACTION**

If a demand for international preliminary examination is made, this opinion will be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA") except that this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notified the International Bureau under Rule 66.1bis(b) that written opinions of this International Searching Authority will not be so considered.

If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of 3 months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.

For further options, see Form PCT/ISA/220.

Box No. I Basis of this opinion

1. With regard to the **language**, this opinion has been established on the basis of:

the international application in the language in which it was filed

the translation of the international application into _____, which is the language of a translation furnished for the purposes of international search (Rule 12.3(a) and 23.1(b)).

2. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:

a. type of material

a sequence listing

table(s) related to the sequence listing

b. format of material

on paper

in electronic form

c. time of filing/furnishing

contained in the international application as filed

filed together with the international application in electronic form

furnished subsequently to this Authority for the purposes of search

3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/JP2006/301759

Box No. V

Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement

However, oral administration of a drug to elderly or bedridden patients is a known problem in the field of therapeutic drugs for the treatment of frequent urination and urinary incontinence, and as noted in documents 2 to 8, the need for a transdermal absorption-type preparation which is easily administered, is long-lasting, and has few side effects is known in the art. Thus, a person skilled in the art could easily conceive of forming a transdermal absorption-type preparation of imidafenacin.

Further, when doing so, optimizing features such as the active ingredient content and the size of the preparation is merely a process fittingly carried out by a person skilled in the art. Tackifiers such as a styrene-isoprene-styrene block copolymer, amphipathic solubilizing agents such as N-methyl-2-pyrrolidone, transdermal permeability enhancers such as triacetin, and oxidizers such as dibutyl hydroxytoluene are known components of a transdermal absorption-type preparation, as disclosed in documents 2 to 8, for example. Thus, using an appropriate combination of the various components is nothing more than the normal exercise of the faculties of a person skilled in the art.

Moreover, no exceptional effect is deemed to result from the above feature.

Accordingly, the inventions set forth in claims 1 to 19 do not involve an inventive step in the light of documents 1 to 8.
